

Deb Macky
MANAGING DIRECTOR

Michael Chester
BUSINESS MANAGER

Aurenda is Australia's leader in injury cost reduction. We give our clients access to unsurpassed depth and breadth of knowledge from the Aurenda team.

Aurenda understands the financial and human cost of workplace injuries and our goal is to help employers reduce these costs.

Understanding Your Business

Understanding your business and its people is something Aurenda does very well. Our qualified consultants analyse your systems to provide technical advice and recommendations to incorporate best practice injury prevention and injury cost reduction systems into your workplace.

Injury Cost Reduction

Comprehensive reviews of existing workers' compensation claims and injury management programs help to control exposure relating to people risk, prevent injuries, lower claim

costs, decrease lost time, accelerate recovery and return to work and reduce future workers' compensation premiums.

Occupational Safety and Health

We reduce hazards and make work practices safer to prevent accidents through workplace redesign and occupational health and safety training programs.

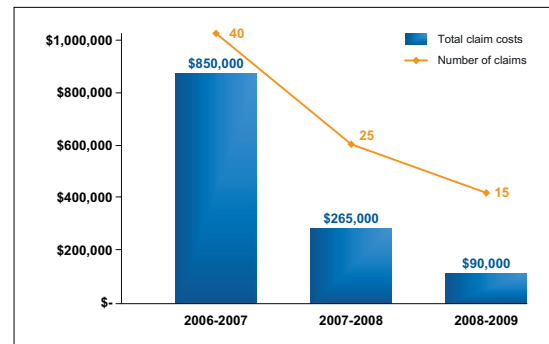

Training and Education

Aurenda is accredited by WorkSafe WA to provide the Five Day Introductory and the Two Day Refresher Training Courses for Safety and Health Representatives. We can cater to

specific training requirements, with topics covering duty of care, workplace bullying and harassment, manual handling and other relevant subjects.

We also offer seminars on significant issues relating to workers' compensation, injury management and occupational safety and health. Our regular e-newsletter, *Adrenalin*, provides updates on topical issues of interest in workplace injury risk management.

Find out how to reduce the financial and human cost of injury in your business by contacting us today. We deliver results no one else can.

In partnership with Aurenda, this business has reduced total claims costs by \$750,000 (90%) in two years.

How do we reduce the cost of injury? Well, it's through a combination of things but ultimately, it's about understanding your business and its people.

Something we do very well.
