

Results – A Closer Look

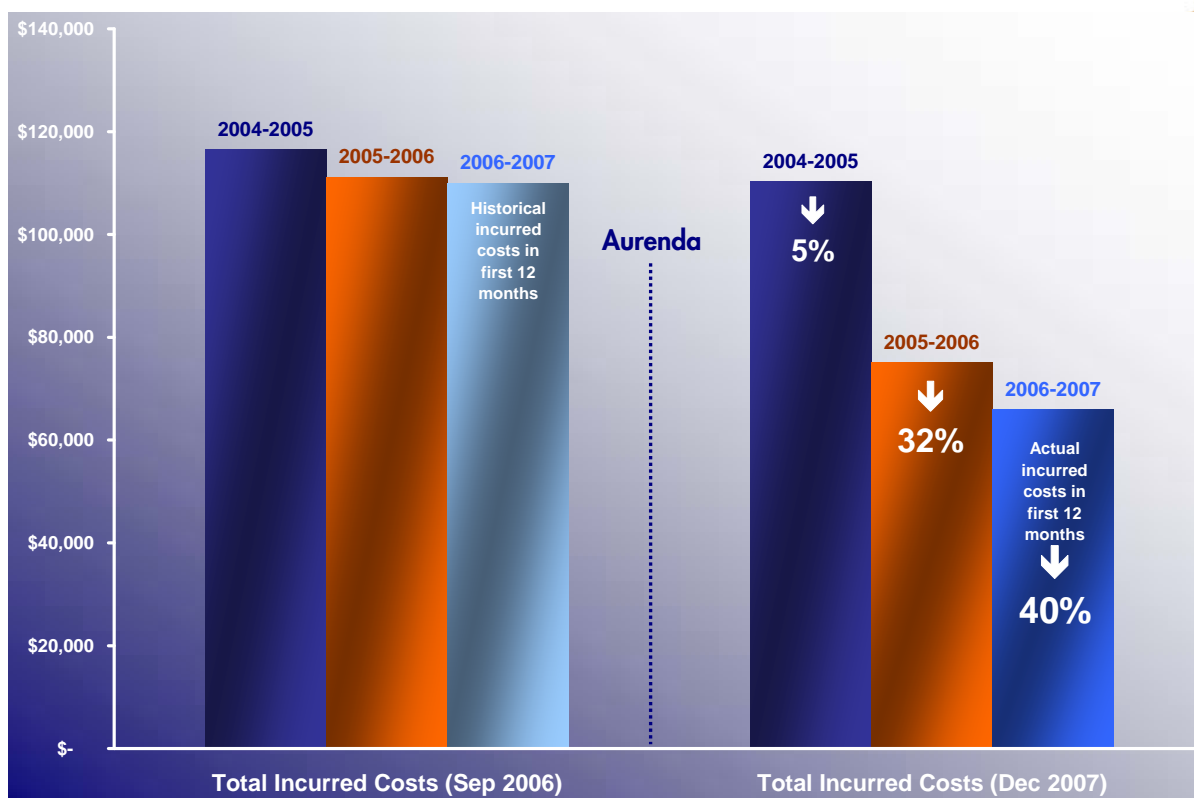

The following graphs show the significant difference Aurenda has made to our clients' businesses.

BECAUSE OF THE DIVERSITY OF OUR CLIENTS

Average workers' compensation claims cost reductions of 40-60% across a range of industries demonstrate the potential impact of Aurenda's injury management program for any organisation.

Cleaning Services	48% reduction in costs in first year 52% reduction in costs by second year
Community Care Services	56% reduction in costs in first year 60% reduction in costs by second year
Construction	35% reduction in costs in first year 40% reduction in costs by second year
Mining	40% reduction in costs in first year 75% reduction in costs by second year
Other Health Services	52% reduction in costs in first year 90% reduction in costs by second year
Public Order and Safety	70% reduction in costs in first year 70% reduction in costs by second year
Transport	35% reduction in costs in first year 49% reduction in costs by second year

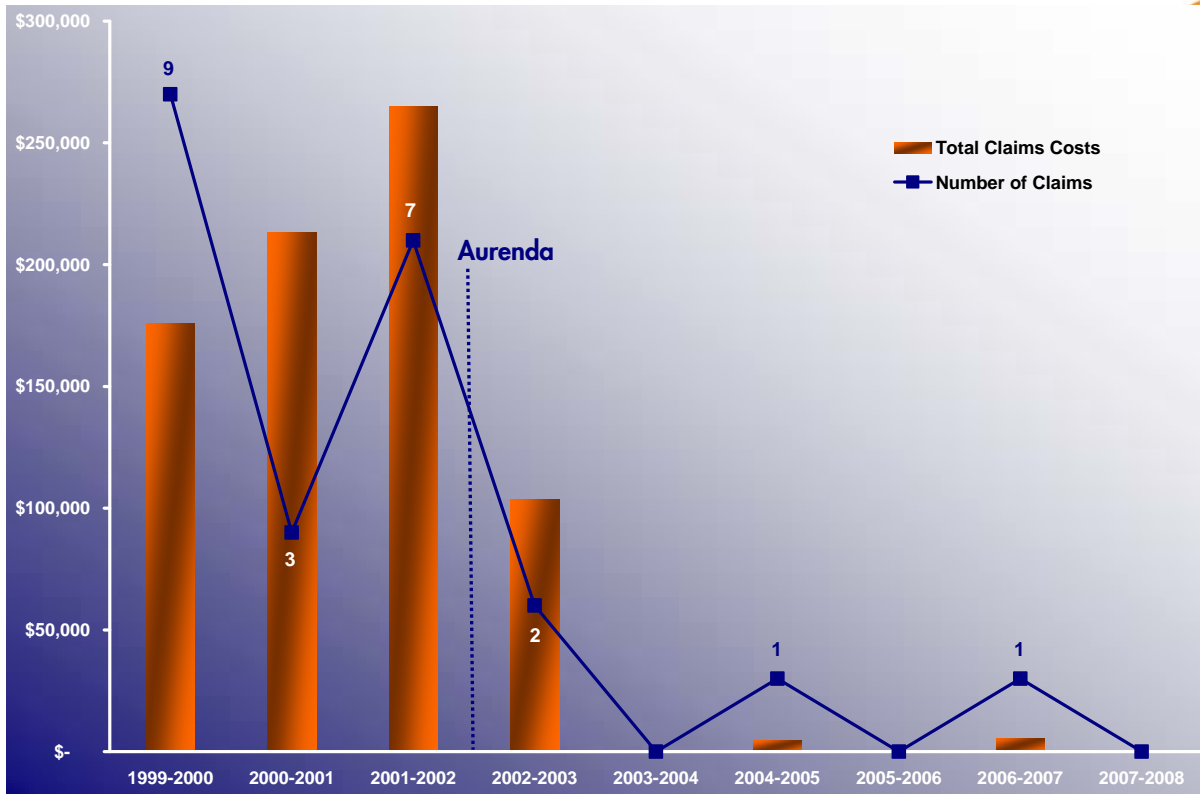

BECAUSE TAKING CONTROL REDUCES COSTS

Within 15 months of implementing a proactive injury management programme, this client achieved 32 to 40 percent reductions in claims costs in current and following years.

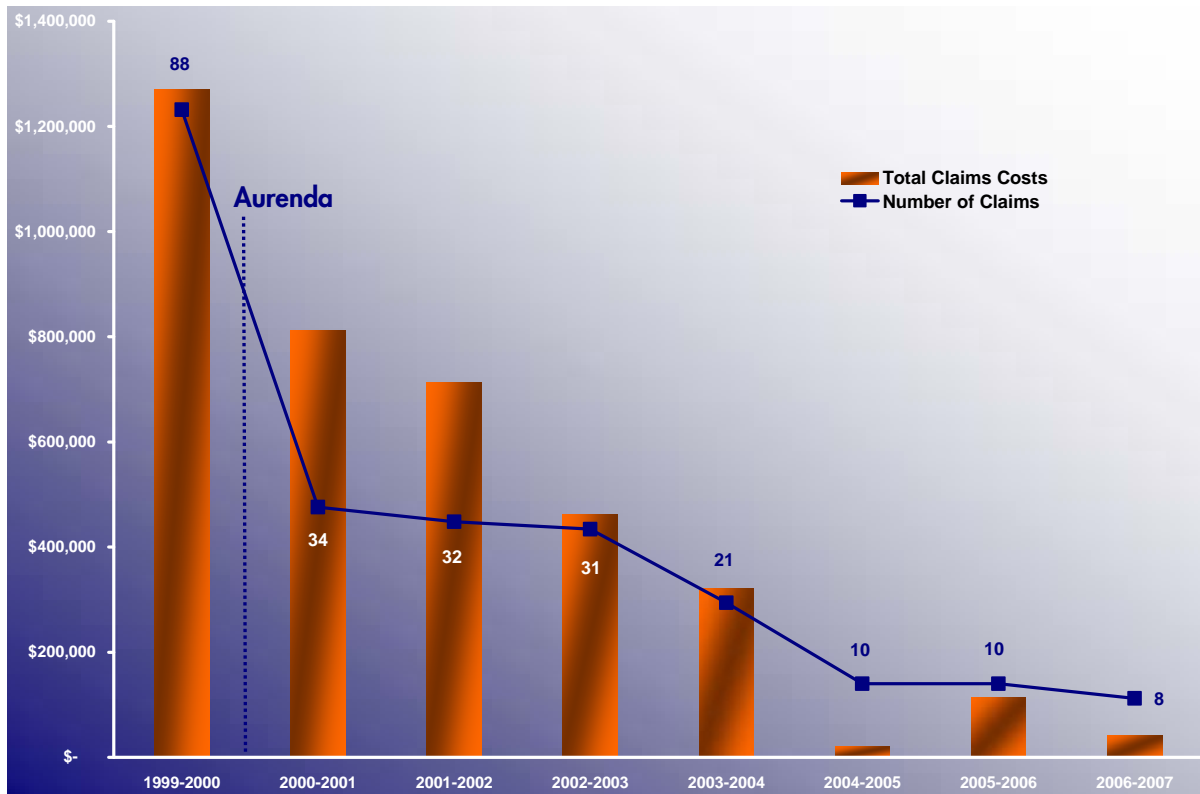

BECAUSE OF SIGNIFICANT SAVINGS

Accumulated savings on workers' compensation premiums of nearly \$1.5m over a five year period have been achieved by this not-for-profit organisation.

BECAUSE CULTURE CAN CHANGE

This business struggled to deal with a compensation culture that was increasing premiums to the point that the business was considering closing. A significant decrease in the frequency and cost of claims and workers' compensation premiums has saved the business.

BECAUSE RESULTS ARE SUSTAINABLE

The results our clients achieve speak for themselves.
